Climate-Friendly Food

For Healthy Kids and a Healthy Planet

Pass a climate resolution with your school board that includes climate-friendly menu language.

Visit <https://schoolsforclimateaction.weebly.com/pass-a-resolution.html> for step-by-step instructions and sample language that will help you successfully pass a climate resolution in your school district. [Schools for Climate Action](#) is a great resource overall!

Find a few friends and prepare a short presentation to the school board member urging them to introduce a resolution in support of taking action on climate change, including serving more climate-friendly school meals. *Pro tip:* Your principal or a teacher can be a great ally to help connect you with a school board member.

Below are a few examples of school districts that have adopted climate-friendly school food language into their climate action resolutions, including mentions of **organic**, **plant-based**, and **food waste reduction** strategies:

- [Gravenstein Unified School District](#) (2019)
- [San Lorenzo Unified School District](#) (2018)
- [Harmony Union School District](#) (2018)
