

Ahold Delhaize

Summary Of Ahold Delhaize Grade

Pollinator Health Policy

5 Out Of 45 Points

EXPLANATION OF POINTS ▾

Ahold Delhaize states that the company continues to expand organic offerings in its 2020 annual report.

Ahold Delhaize does not have a written, publicly available pollinator health policy for food and beverage supply chains that addresses the need to reduce use of pesticides of concern to pollinator and human health. A strong policy would include shifting to least-toxic farming approaches in order to avoid regrettable substitution of one toxic pesticide with another. The ecological farming methods that underpin organic farming, integrated pest management and regenerative agriculture reduce farmers' overall need for pesticides.

Commitment to reduce pesticide use

0 out of 15 points

Avoiding regrettable substitutes

0 out of 5 points

Commitment to least-toxic approaches in non-organic supply chains

0 out of 10 points

Commitment to organic

5 out of 15 points

Implementation

15.5 Out Of 90 Points

EXPLANATION OF POINTS ▾

Ahold Delhaize's 2023 annual report states that some of its banners continue to expand organic offerings. Ahold Delhaize reports that 100% of own brand coffee, tea and cocoa are certified by Rainforest Alliance and Fair Trade certifications, which have meaningful criteria on Integrated Pest Management, and in some cases, restrictions on pesticides of concern. In 2021, Ahold subsidiary Giant Co. established a partnership with organic research center, Rodale Institute, to support U.S. farmers' transition to organic agriculture. Ahold Delhaize reports pilot-level efforts to track suppliers' pesticide use and third-party certifications that verify Integrated Pest Management practices.

Ahold Delhaize has not taken any other discernible action to reduce use of pesticides of concern to pollinator and human health or expand organic farming and other least-toxic approaches in its supply chains. The actions we evaluated include: 1) tracking use of pesticides in company supply chains, 2) measurably reducing pesticide use in the past three years and publicly reporting on data, 3) supporting farmers in non-organic supply chains to shift to least-toxic approaches such as

integrated pest management and regenerative agriculture, 4) measurably expanding organic offerings in the past three years, 5) demonstrating support for U.S. growers to transition to organic farming, and 6) demonstrating advocacy for public policies aimed at reducing agricultural pesticide use, protecting pollinators and supporting the expansion of organic agriculture in the U.S.

Track pesticide use in supply chain

3 out of 10 points

Measurably reduce pesticide use

0 out of 15 points

Prioritize least-toxic approaches in non-organic supply chains

2.5 out of 20 points

Prioritize USDA certified organic

5 out of 25 points

Support domestic organic growers

5 out of 15 points

Support public policies

0 out of 5 points

Transparency & Accountability

4.5 Out Of 21 Points

EXPLANATION OF POINTS ▾

Ahold Delhaize has a publicly available commitment to expand organic offerings. Ahold Delhaize also includes percent of total food sales from organic products as a Key Performance Indicator in its annual reports.

Ahold Delhaize does not have publicly available commitments or policies related to reducing use of pesticides of concern to pollinators and human health in its supply chain. Ahold Delhaize does not include reduction of pesticides of concern to pollinators and human health in company Key Performance Indicators or other formal sustainability criteria. Ahold Delhaize does not have educational content online about pesticides or organic farming, such as a full definition of the USDA certified organic label (prohibition of synthetic pesticides and fertilizers, GMOs, antibiotics, and growth hormones, and promotion of farming methods that protect soil, water and biodiversity) or content on the value to pollinator and human health of decreasing use of toxic pesticides and expanding organic offerings.
