Join us for the *Netroots Nation* panel discussion, **Copenhagen to Cancun: Climate Negotiations and the Netroots**, moderated by Friends of the Earth's Kate Horner, at 4:30 p.m. on Thursday, July 22.

Friends of the Earth and our federation of grassroots groups in 77 countries are a loud and fearless force for the sustainable and fair use of the Earth's resources.

We're progressives who confront the economic forces fueling ecological destruction and injustice and don't shy from speaking sometimes uncomfortable truths to power. It's an approach that has produced important victories for 41 years.

Our current campaigns focus on promoting clean energy and solutions to climate change, keeping toxic and risky technologies out of the food we eat and products we use, and protecting marine ecosystems and the people who live and work near them.

We need your help to win these campaigns. We invite members of the progressive netroots to check us out and join our team at www.foe.org, @foe_us on Twitter and at Friends of the Earth U.S. on Facebook.
